Dear Parent/Guardian

HOMEWORK APP

St Marys Grammar School is committed to using educational technology to improve further the learning experiences and achievements of all our pupils. The use of iPad technology provides our pupils with opportunities to fully engage in their learning. To further enhance the digital learning environment of our school, we will be utilising digital student planners for those pupils who have iPad devices. Your child will be using My Homework App in replace of a paper student planner. This application will be downloaded on to their school iPad device and will allow them to create their timetable and record their homework for all subjects for the academic year ahead.

To further support your child in their learning, we will be providing a User Support guide for parents which will assist you in understanding My Homework App and the ways in which you can monitor your child's recording and completion of homework.

With every good wish,

Yours sincerely

D Gillespie (Mrs)
Principal
